

Definition

- Do you agree with the definition?
- Other impairments
- Performance measures
- Less complex
- Different versions for different targets

Definition

- **A diversion of attention from the driving task not related to impairment from alcohol, fatigue or medical conditions.**
- **Diversion occurs because the driver is:**
 - temporarily focusing on an object, task, event or person not related to the driving task
- **Diversion reduces a driver's situational awareness, decision-making and/or performance which increases the risk of**
 - Collisions
 - Near-collisions
 - Necessary corrective action

Definition

- Is it sensitive?
- Definition overlays on internal states
- Within individual differences
- Age differences
- Distractors by age

Risk

- Research questions
- Exposure data
- Protective elements
- Measure usage
- Causal models
- Burden

Risk

- Motivation to change by age
- Knowledge and attitudes
- Pre-crash states
- “vehicle time”

Data

- **Uniformity of definitions**
- **Usefulness of police data**
- **Black box**
- **Collision investigation**
- **Observational studies**
- **Simulator/track/on road**

Data

- **Common methods**
- **Common dependent measures**
- **Data sharing**
- **Accessibility**
- **Qualitative information – focus groups &/or in-vehicle audio**
